HAIR & SCALP / DEVICE COMPARISON

Choose with the whole picture.

Compare two exact models before paying. Keep this worksheet privately. The guide explains the evidence; this sheet records your decision.

Device / seller	Option A	Option B
Exact model and FDA record		
Evidence relevant to my hair loss		
Minutes per session / sessions per week		
Price, tax and shipping		
Return window / starts from which date?		
Return fee / documentation needed		
Warranty / battery coverage		

Two calculations worth doing

Weekly time = session minutes x sessions per week. For an every-other-day schedule, use 3.5 sessions as the weekly average.

Percentage return fee = device price paid x fee percentage. Add any return shipping and other applicable deductions.

A warranty covers specified defects. A growth guarantee has separate return conditions.

HAIR & SCALP / DEVICE COMPARISON

Make a plan you can reassess.

Bring the exact model and your questions to your provider. This is a discussion aid, not a diagnosis or a treatment schedule.

1. What type of hair loss am I treating, and what is a realistic goal?

2. Does the evidence and labeling fit me?

3. What else am I using, and how will the routines fit together?

4. What symptoms should prompt me to stop and seek advice?

5. My progress review date and separate return deadline

Keep progress photos comparable

Use the same lighting, angle, part and hair condition. Record treatment changes and symptoms. A photo is a record, not proof that one treatment caused the change.
